SUMMARY

Front-end-focused Computer Science student with hands-on experience building reusable, cross-platform web components in React.js and Next.js. Skilled at resolving Core Web Vitals issues and optimizing cloud/edge infrastructure for low-latency performance, with strong communication and cross-functional collaboration skills.

EDUCATION

Bachelor of Technology, Computer Science, Uttaranchal University Expected 2027
CGPA: 7.2

Class XII, Doon Heritage School 2023
Percentage: 70%

SKILLS

Languages	Java, JavaScript, TypeScript, SQL
Frontend	React.js, Next.js, HTML, CSS, ShadCn, Tailwind
Backend	Node.js, Express.js, REST APIs, WebSockets, Drizzle ORM
Cloud & DevOps	AWS, Cloudflare (Workers, R2, Turnstile), Vercel, Docker, Kubernetes
Databases	MongoDB, FireBase, SupaBase
AI & Tools	Generative AI, RAG, Prompt Engineering, Git, GitHub, CI/CD

EXPERIENCE

Software Engineer Intern Aug 2026 - Present
HPC Infotech *Hybrid*

- Develop, test, and debug software features end-to-end, applying coding best practices under the project supervisor's guidance.
- Collaborate with the engineering team on implementation, troubleshooting, and code reviews to ship reliable releases.
- Document technical work to support knowledge sharing and consistency across the codebase.

Full Stack Web Development Intern & Technical Lead June 2026 - Aug 2026
The Infinite Tours *Remote*

- Spearheaded the modernization of legacy infrastructure into a globally distributed edge network, documenting choices via Architectural Decision Records (ADRs).
- Eliminated 50+ second cold start delays by migrating to Cloudflare Workers with Drizzle ORM, and engineered a zero-egress Cloudflare R2 image pipeline that cut payload sizes by up to 70%.
- Executed a 5-sprint roadmap to resolve Core Web Vitals issues, eliminating Cumulative Layout Shift (CLS) and implementing enterprise-level structured data for SEO.
- Secured shared UIs against spam using Cloudflare Turnstile and deployed the platform's core AI chatbot interface.

PROJECTS

Triple A Fitness — Admin Dashboard. Built and deployed a gym management platform serving 100+ users across multiple gyms, with a QR-based attendance system that cut manual tracking by 80%. Developed role-based frontend architecture for Admin, Trainer, and Member apps with real-time sync via WebSockets. (React.js, Node.js, MongoDB)

ACHIEVEMENTS

- Google UI/UX Design Professional Certificate (Coursera).
- Achieved top search rankings through SEO optimization and performance improvements for Infinite Tours.
- Forage JP Morgan Software Engineering Virtual Experience Program.
